L19: Entry 1 of 2

File: USPT

Jul 30, 1985

DOCUMENT-IDENTIFIER: US 4532315 A

TITLE: Rapidly hardening organopolysiloxane compositions comprising polyacyloxysilane cross-linking agents

Brief Summary Text (90):

The compositions according to the invention may be employed for many applications such as sealing in the building industry, the assembly of the most diverse materials (metals, plastics, natural and synthetic rubbers, wood, cardboard, crockery, brick, ceramics, glass, stone, concrete, masonry components), the insulation of electrical conductors, the coating of electronic circuits, or the preparation of molds employed in the manufacture of objects from synthetic resins or foams.

Detailed Description Text (6):

(4) 20 parts by weight of rutile-type titanium dioxide having a mean particle diameter of 8 microns;

Detailed Description Text (23):

(3) 85 parts by weight of a diatomaceous silica having a mean particle diameter of 5 microns;

Detailed Description Text (42):

(3) 14 parts by weight of diatomaceous silica having a mean particle diameter of 5 microns; and
